

- West Florida Hospital offers acute inpatient psychiatric treatment with 18 beds dedicated to geriatric patients, and 38 beds dedicated to adults.
- Our average length of stay is approximately 6 days for adults, and 10 days for geriatric patients.
- We service over 2500 patients a year providing for the behavioral health needs of patients from all across the Panhandle of Florida, as well as some parts of Alabama.
- Our Geriatric program is the first inpatient psychiatric program in the State of Florida (and first in all of HCA) to be recognized by the Institute for Healthcare Improvement as an Age Friendly Health System with the status of: “Committed to Care Excellence”.
- Additionally, our facility offers Adult Intensive Outpatient Treatment utilizing a 12 week, evidence-based curriculum.
- Our team of psychiatrists, nurses, mental health technicians and therapists are dedicated to the improvement of human life through the delivery of safe and effective mental health treatment.
