BAPTIST BEHAVIORAL MEDICINE CENTER

TREATMENT AND HOPE

For more than 50 years, the Behavioral Medicine Center has been helping people with psychiatric illnesses lead fulfilling and productive lives. Recovery begins the day a patient arrives – working with the individual and a multidisciplinary team to determine the best possible treatment plan.

Who We Serve

Baptist Behavioral Medicine Center serves children, adolescents and adults who are experiencing acute depression, anxiety, paranoia, schizophrenia, substance abuse or suicidal thoughts.

What to Expect at the Behavioral Medicine Center

- The treatment program is tailored to the individual's unique strengths and resiliencies.
- Separate floors for men, women and youth allow us to better meet the different needs of each of these groups.
- The Therapeutic Activities Team ensures that patients participate in a wide variety of individual, group and family counseling programs.
- Peer specialists, trained advocates, assist each patient.
- Patients and their families are included as part of the treatment team.
- A multi-disciplinary team of psychiatrists, psychologists, nurses, therapists, counselors and peer specialists designs each patient's treatment plan.
- Most major insurance plans are accepted.

How to Refer

- Call the Behavioral Medicine Center's 24-hour direct referral line: [850.434.4808](tel:850.434.4808)
- Patients may go directly to the Baptist Hospital emergency room, where they will be immediately received in a separate, secure and private psychiatric area.

When Ready for Discharge

Prior to discharge, we connect patients and their families with the support and services they will need to continue recovery.
