

A close-up photograph of a doctor's hands holding a patient's hands. The doctor is wearing a white lab coat over a blue scrub top, with a stethoscope visible around their neck. The patient's hands are being held gently, with the doctor's fingers interlaced with the patient's. The patient's nails are painted with a light pink polish. The background is softly blurred, showing more of the doctor's coat and the patient's arm.

Mental Health Task Force of Northwest Florida

Community Alignment and Strategic
Planning Project

May 19, 2023

Today's Agenda

- ▶ Welcome and announcements - Representative Salzman
- ▶ Legislative overview - Representative Salzman
- ▶ Tallahassee support of mission - Secretary Harris and Chief of Staff Grow
- ▶ Update on crisis stabilization - Allison Hill, Jennifer Grove, Gabe Bullero, Jules Kariher
- ▶ Introduction of EY team - Representative Salzman
- ▶ Strategic Plan overview - EY (Rod Garvin and Dr. Terri Timberlake-Briscoe)
- ▶ Navigating the Roadmap - Mike Watkins
- ▶ Roadmap workshop activity - EY
- ▶ Final Remarks - Representative Salzman

Welcome & Announcements

Legislative overview & Tallahassee support of mission

Update on crisis stabilization

Strategic Plan overview

Strategic Plan project recap

CLIENT COLLABORATION AND STAKEHOLDER ENGAGEMENT

Background Research and Discovery Dec. 2022 to March 2023

- ▶ Information request & background review
- ▶ Scan of primary programs and funding
- ▶ Stakeholder questionnaire
- ▶ Interviews and focus groups
- ▶ Leading practices research
- ▶ Focus Groups Meetings
- ▶ Mental Health Task Force meeting

Visioning and Strategic Plan Feb. to April 2023

- ▶ Strategic framework with top priorities and goals
- ▶ Future state visioning session
- ▶ State leader conversations
- ▶ Identification of performance measurements

Deliverables Feb. to May 2023

- ▶ Background Review and Research Summary
- ▶ Strategic Plan and Roadmap
- ▶ Final presentation of strategic plan to Mental Health Task Force (May 2023)

Stakeholder input: 110+ unique participants

Stakeholder Questionnaire (December)

Digital questionnaire
developed by EY
with client input

Interviews (Dec. to March)

Interviews with local
leaders selected by the
client

Focus Groups (Jan. to March)

Conversations with
stakeholder
organizations

State Level Conversations (Jan.-Feb.)

Meetings with state
agency representatives

Task Force and Future State Visioning Meetings (Jan.-Feb.)

Strategic planning and
visioning workshops

Final Presentation (May)

Overview of strategic plan
report with Task Force

Research and analysis: Understanding the behavioral health landscape

- Background information review of 30+ documents and data sources
- Environmental scan of key services and programs currently available
- Evaluation of funding for behavioral health at a national and state level
- Research on national models and leading practices

Envisioning the future of behavioral health care

Future state vision

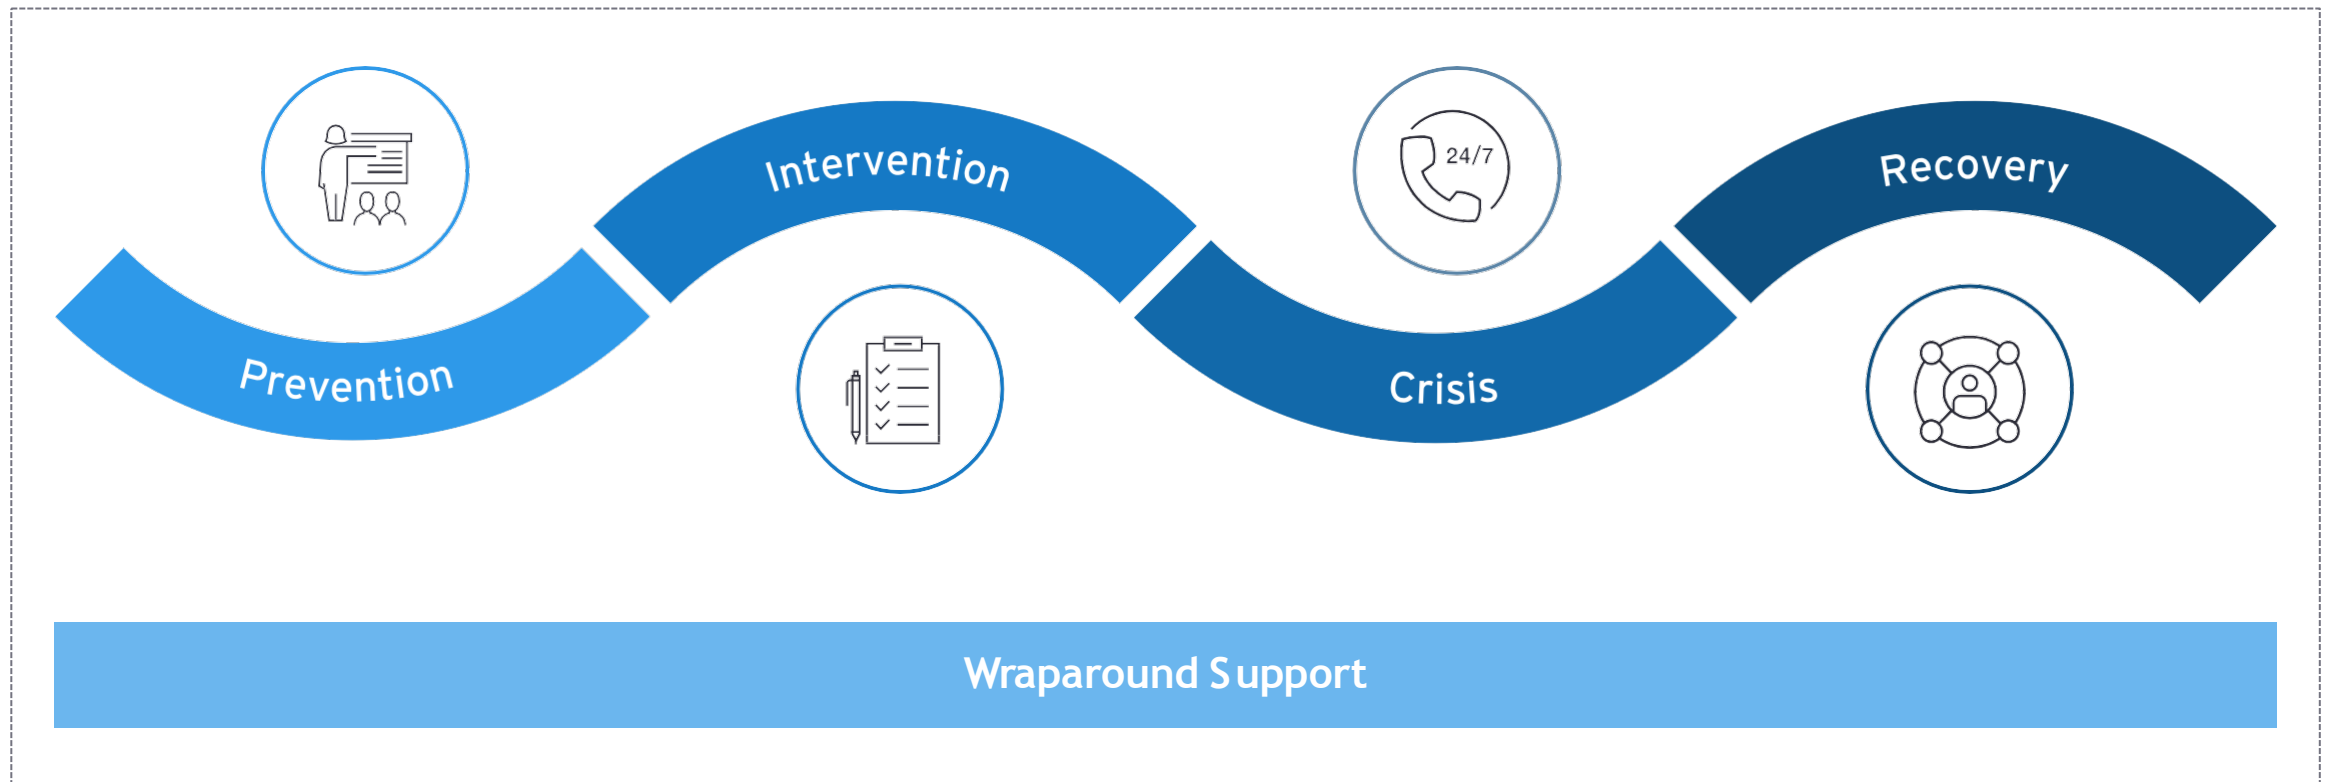

The EscaRosa region is a leading community in the nation for the provision of comprehensive behavioral health care and improved patient outcomes.

Strategic framework: Optimizing the continuum of care

Optimizing the continuum of care

Goal: An optimized continuum of care will include a full spectrum of services and supports that are easily accessible, seamlessly coordinated and highly responsive.

Strategic framework: Building capacity

Building capacity

Goal: The EscaRosa region has robust capacity to support a full continuum of care, including a skilled workforce, modernized data systems and impactful communications.

Prevention

1.1 Expand school-based and community-based prevention services and programs

Actions and next steps to consider:

- Host interagency mental health and wellness events in schools and throughout the community.
- Facilitate programs and activities during **Red Ribbon Week**.
- Increasing translations for bilingual residents and those who have a primary language other than English.
- Align prevention efforts with community public information campaign.

1.2 Establish a regionwide, substance use disorder (SUD) prevention initiative

Actions and next steps to consider:

- Establish a local **Red Ribbon Campaign steering committee** with faculty, BH providers and peers, law enforcement partners, and others.
- Increase access to **Naloxone kits** and increase **Naloxone training** for law enforcement and EMS first responders.
- Dedicate **community-based opioid prevention methods** by providing access to naloxone distribution programs and fentanyl test strip distribution.
- Collaboration between BH providers and NAMI to operationalize a **peer warm line (call center)** to share information via multilingual communications.

Intervention

2.1 Enhance co-responder capabilities

Actions and next steps to consider:

- Dedicate resources within Escambia and Santa Rosa police departments for a **needs assessment to determine level of services and staffing** required.
- Consider funding resources to support a **co-responder program to aid collaboration between BH providers and law enforcement**. This can include hiring Peer Specialists as part of the co-responder team.
- **Partner with NAMI Pensacola's developing qualified peer network as these professionals will have the required 40-hour certification.**

2.2 Implement Transitional Residential Treatment (TRT)

Actions and next steps to consider:

- Evaluate the possible **expansion of existing short-term residential sites**
- Explore a **state plan amendment** with the Florida Agency for Health Care Administration to include **residential rehabilitation as a reimbursable service**.

Intervention

2.3 Expand Link, Engage, Assess, Plan (LEAP) and Community Action Team (CAT)

Actions and next steps to consider:

- **Expand CAT and LEAP programs** for children, transition-aged youth and adults with BH needs services to improve behavioral health outcomes for individuals.
- Consider funding an **additional ACT team** to support Escambia and Santa Rosa counties as demand for BH services increases with growing awareness.

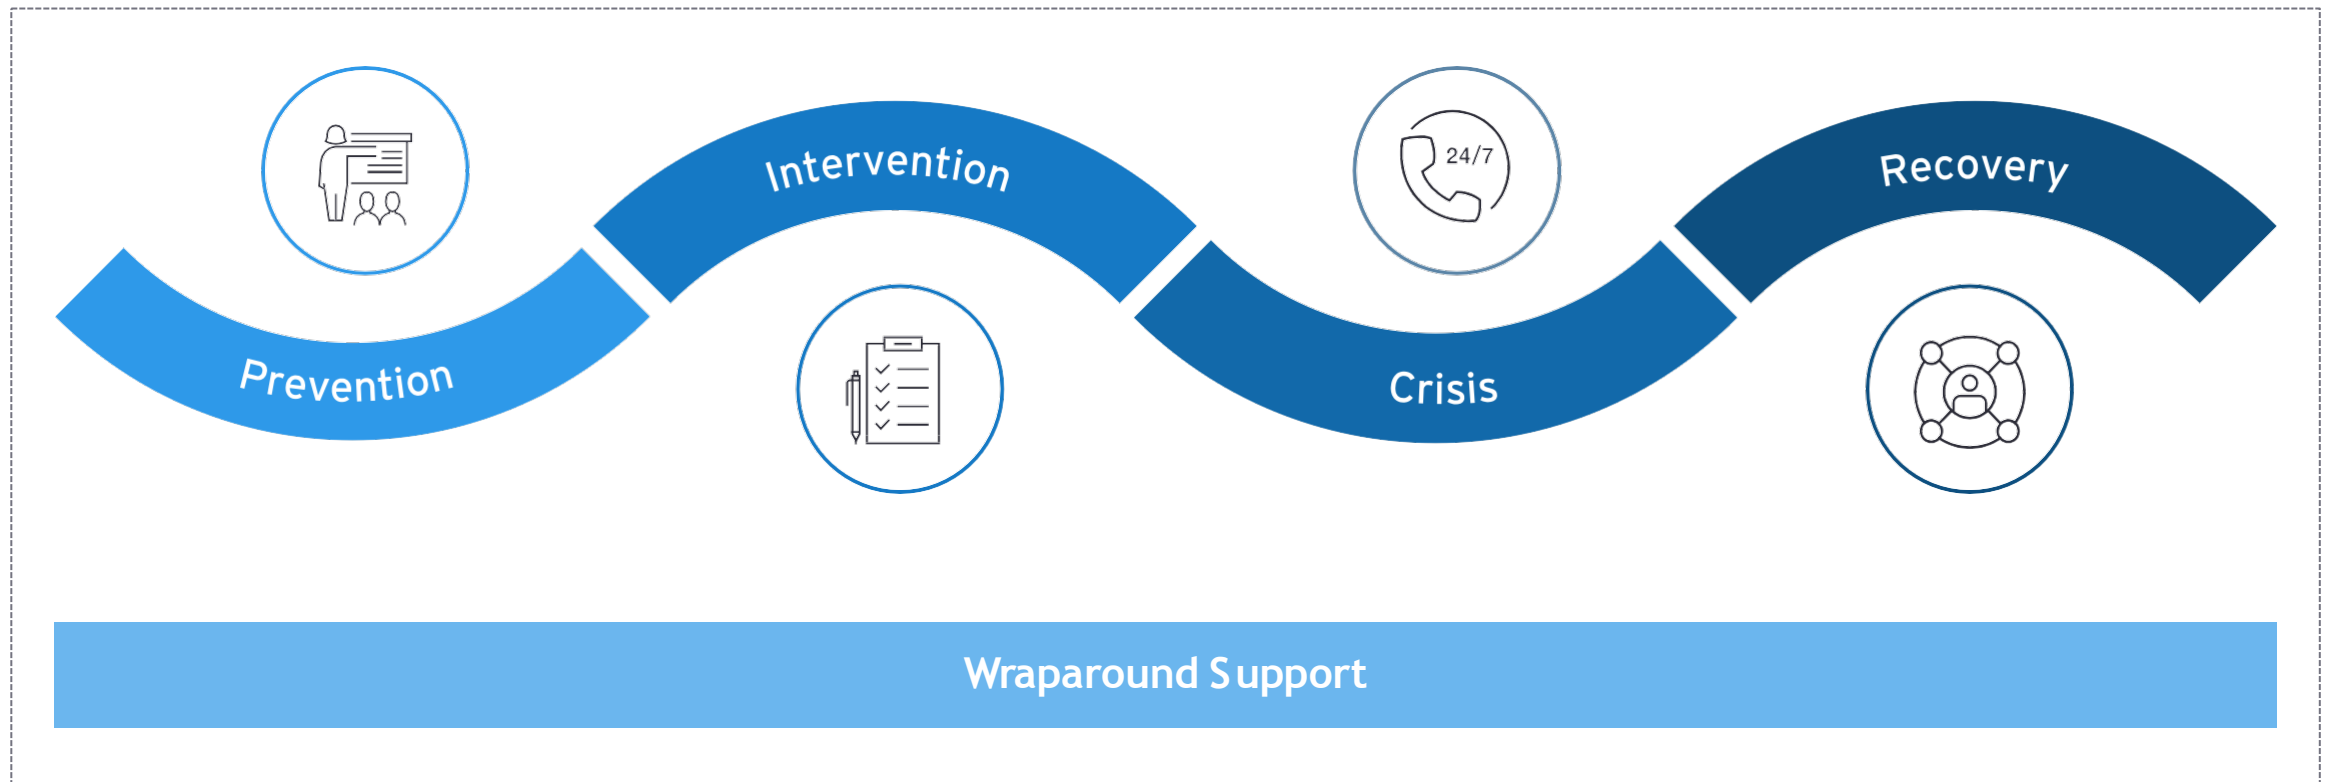

Strategic framework: Optimizing the continuum of care

Optimizing the continuum of care

Goal: An optimized continuum of care will include a full spectrum of services and supports that are easily accessible, seamlessly coordinated and highly responsive.

Crisis

3.1 Establish a Community-Based Behavioral Health Crisis Center (BHCC)

Actions and next steps to consider:

- Provide **non-Baker Act BH walk-in services** in a non-hospital setting
- Introduce **policy support** for three components of a BHCC: 24/7 BH crisis walk-in living room model, temporary observation unit inclusive of detox beds, and CSU (ERF) services.
- Hire **peer specialists, nurses, MD, facility support staff**, and facility location identification.

3.2 Expand Mobile Response Team

Actions and next steps to consider:

- Dedicate staffing resources to hire **Peer Specialists (CPSs)** to work alongside with licensed BH MRT staff.
- Dedicate staffing resources to hire **BH licensed staff with specific SUD and MH experience**.
- Utilize a public information campaign to **increase awareness** on how to access MRT.

Recovery

4.1 Establish a drop-in center

Actions and next steps to consider:

- NWF Health Network can identify the **lead community BH provider and peer advocacy organization** to implement
- Identify **certified peer specialists** to be hired in the drop-in center.

4.2 Explore the development of clubhouses

Actions and next steps to consider:

- Task Force partners could organize a project workgroup to **evaluate clubhouse models** to determine what best fits the community's needs.
- Partner with **higher education** institutions and/or **youth-serving organizations** for youth clubhouses.
- Employ **youth peers** or as volunteers.

Recovery

4.3 Expand peer support services

Actions and next steps to consider:

- Invest resources for additional state-funding to **increase CPS training and number of CPSs** working in outpatient, inpatient and crisis settings.
- **Increase enrollment of peers** in the existing CPS training.
- Continue **collaboration with NAMI** and engage them as a key partner in CPS recruitment and training.
- Invest in a **regional recovery plan** to build upon NAMI's efforts in recruitment, training, community education and hiring initiatives.

Wraparound Support

5.1 Expand permanent supported housing

Actions and next steps to consider:

- Garner support for state legislative funding allocations for the **Pensacola Housing Authority** to provide housing vouchers for rental assistance.
- BH providers could prepare **housing applications**, support subsequent placement, and provide ongoing case management and engagement.

5.2 Establish Mental Health Treatment Courts (MHTCs), also known as Accountability Courts or Diversion Courts

Actions and next steps to consider:

- Develop an advisory group consisting of **civil court judges** and **BH providers** to create an MHTC/accountability court team
- Collaborate with the **National Drug Court Institute** and **Substance Abuse and Mental Health Services Administration (SAMHSA)** to offer resources help reduce the recidivism of offenders with BH needs.

Wraparound Support cont.

5.3 Non-emergency transportation assistance program

Actions and next steps to consider:

- Maximize existing coverage for Medicaid non-emergency transportation programs for enrolled individuals.
- Contract non-emergency transportation company for services.

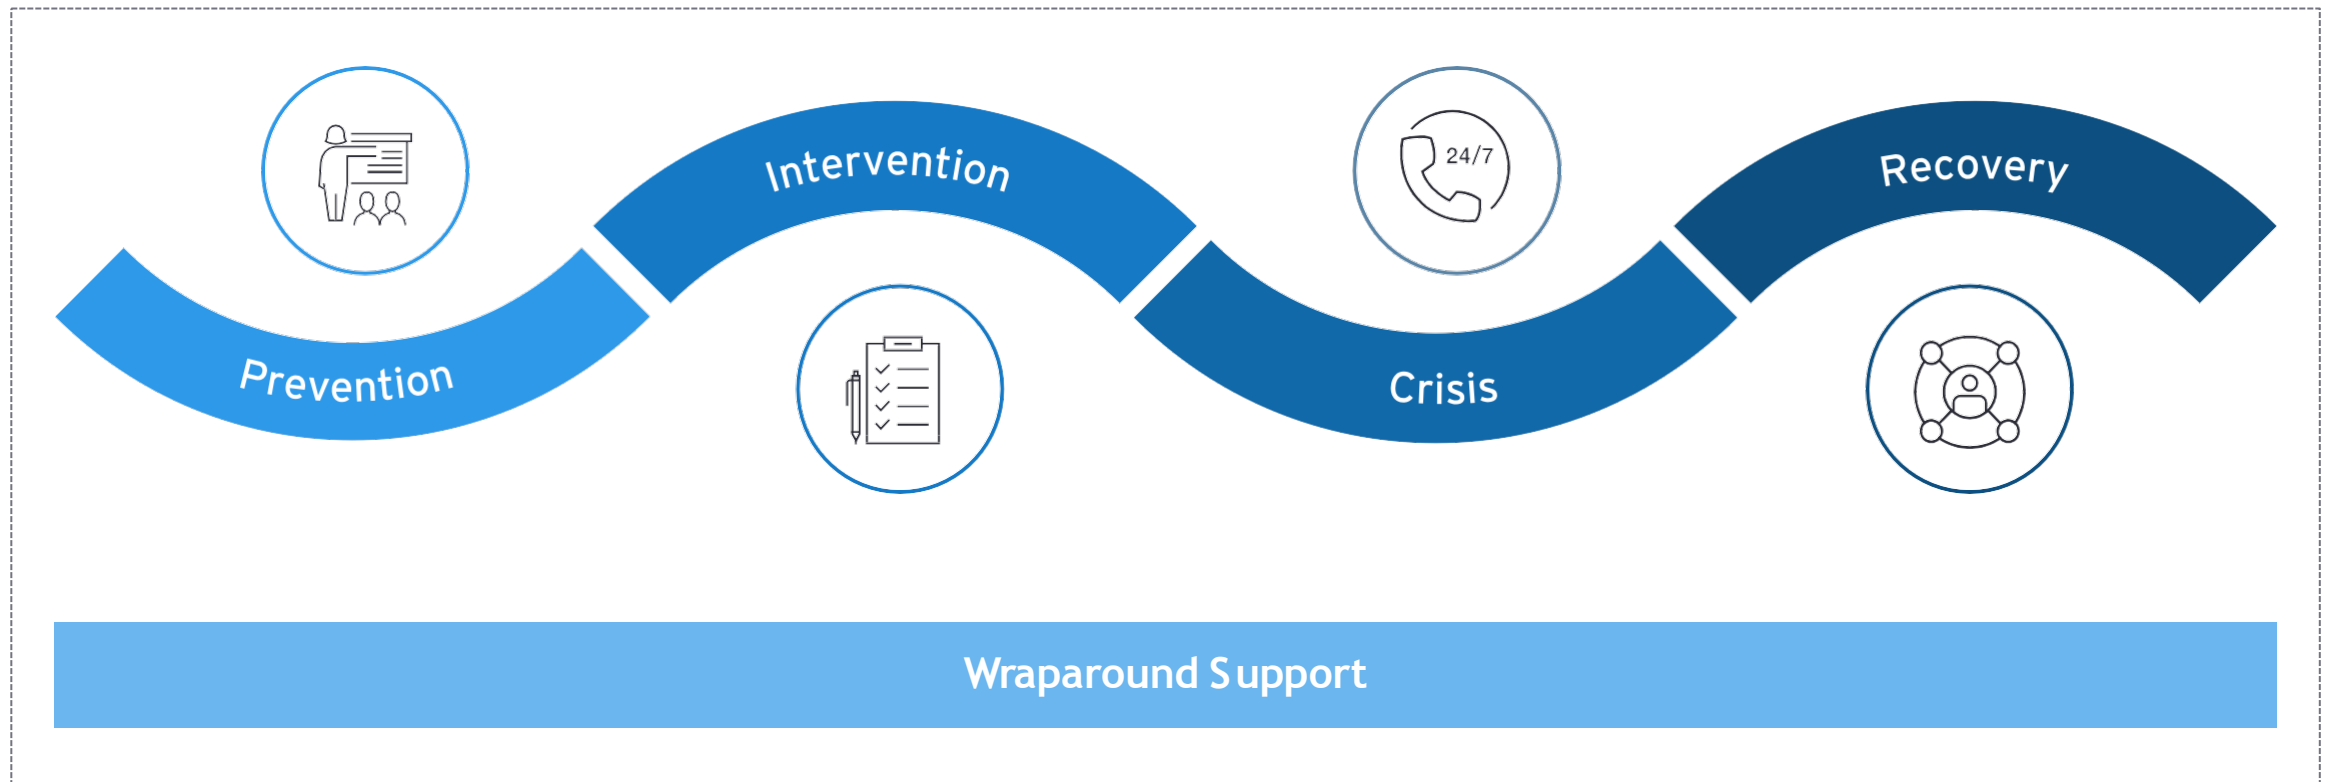

Strategic framework: Optimizing the continuum of care

Optimizing the continuum of care

Goal: An optimized continuum of care will include a full spectrum of services and supports that are easily accessible, seamlessly coordinated and highly responsive.

Strategic framework: Building capacity

Building capacity

Goal: The EscaRosa region has robust capacity to support a full continuum of care, including a skilled workforce, modernized data systems and impactful communications.

Enhancing workforce availability

1.1 Develop a regional undergraduate and graduate assistantship

Actions and next steps to consider:

- The **UWF BH workforce committee** can collaborate with the **Task Force** to explore and plan the development of the assistantship.
- BH providers may consider becoming **National Health Service Corps (NHSC)** member sites to receive funding support for **scholarships and loan repayment**.
- Task Force members could in partnership with DCF and DMAS explore facilitation of a Medicaid rate study and cost analysis. Outcomes should be used to make appropriate rate adjustments.

1.2 Enhance training for existing BH professionals and others

Actions and next steps to consider:

- Develop a **regional training program** and foster more **inter-professional task-shifting** to increase the number of behavioral health professionals.
- A **shared tracking method** could help enhance current understanding of BH workforce needs.

Enhancing workforce availability cont.

1.3 Create a regional behavioral health talent attraction initiative

Actions and next steps to consider:

- Pilot a BH talent attraction initiative as a part of larger regional talent recruitment efforts.
- Collaborate with service providers to **understand current talent acquisition** efforts, as well as **target colleges/universities and geographies** for marketing efforts.
- Leverage **multimedia communication channels** including social media, internet advertising and content streaming platforms, with information disseminated by colleges and universities, among other conduits.
- Determine and promote **financial and other incentives** that can garner interest among BH professionals to encourage relocation to and/or staying in the community.

Strengthening technology and systems

2.1 Improving interoperability and data sharing

Actions and next steps to consider:

- Maximize **existing data warehouse** through enhanced partnership with Strategic Health Intelligence (SHI).
- Exploring **expansion of access to BH data** for all eligible providers and partners.
- Activation of **data-sharing agreements** could be enacted between law enforcement, EMS and BH agencies specific to the target population. Consideration for EHR interface/allowable PHI data is needed.
- **Collaborate with colleges, universities and workforce development** partners that have established access to large data systems.
- Leverage **Achieve Healthy EscaRosa** data and dashboard.

Expanding access and awareness

3.1 Broaden community public information campaign

Actions and next steps to consider:

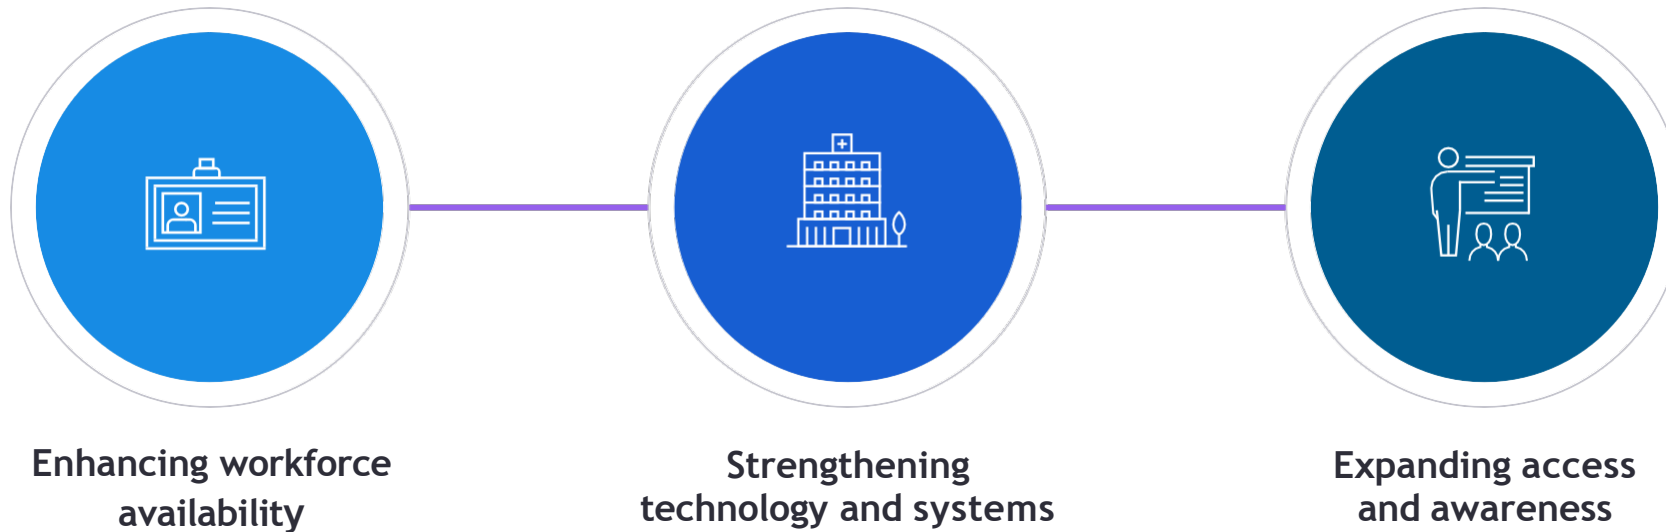

- Task Force members could convene a committee or project workgroup to develop a coordinated plan for the BH access and awareness campaign.
- Marketing, public relations and communications professionals from the hospitals and agencies could be invited to join the workgroup and assist with audience segmentation, identification of communication channels, content development and dissemination.
- Partnering with a professional services firm with marketing and public relations capabilities could also be considered.

Strategic framework: Building capacity

Building capacity

Goal: The EscaRosa region has robust capacity to support a full continuum of care, including a skilled workforce, modernized data systems and impactful communications.
